SHOWER CURVE

EXPAND YOUR SHOWER SPACE BY AT LEAST 25%!

SHOWER CURVE will increase the space in your bathtub !

Even if your tub is narrow you can enjoy a wider showering area due to the curvature at the centre of the shower rod. The curve at the corners can allow the drape of the standard curtain along the inside rim and can thus help prevent water from leaking on to your floor. The SHOWER CURVE can fit standard or oval 60" tubs. Mounting hardware is included.
