PRODUCT GROUP # 16 PLUMBING & HEATING SPECIALTIES

Waterline **PowerAir™** AIR BOOSTERS

PowerAir™ Air Boosters improve air flow and distribution of air to problem rooms. Mounted in the ductwork they improve air flow, creating heating/cooling system efficiency and energy savings. There are three models designed for round and square ducts.

PowerAir™ Air Booster
Model # 1950103

- Unique design will work with square, rectangular and round metal duct work
- Easy installation
- Can be used with forced air, oil, gas and electric furnaces and heat pump
- the most durable, long lasting air booster on the market
- CFM # 275

CASE QTY # 8

PowerAir™ Air Booster
Model #1950104

- Designed for round or rectangular metal duct work 6" or larger
- Easy installation
- Heavy duty motor designed for years of trouble free operation
- CFM # 220

CASE QTY # 12

PowerAir™ Air Booster
Model #1950101

- Designed for use in 5" round metal or flexible duct work
- Easy installation
- Heavy duty motor designed for years of trouble free operation
- CFM # 170

CASE QTY # 12

PowerAir™ Activator
Model #1950105

- For automatic, year round operation of all air booster models (optional)
- In Duct Air Pressure Activated

Ready to wire to furnace blower or wall switch.

CASE QTY # 1

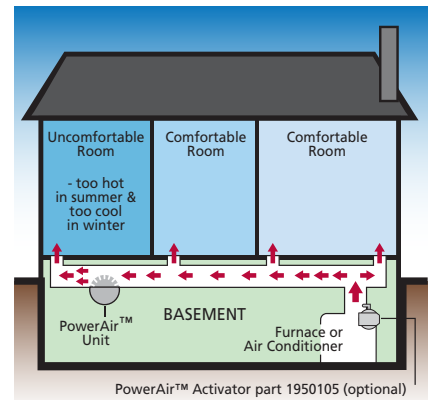

PowerAir™ Register Booster
Model #1950106

- Works automatically with forced air heating & air conditioning.
- Improves circulation.
- Fits floor / Wall registers upto 6" x 12".

CASE QTY # 12

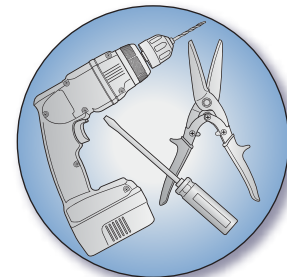

Here's how your PowerAir™ Air Booster Fan works:

In winter, the rooms close to the heating system are comfortable but the rooms at the other end of the house are cold.

Your PowerAir™ Air Booster Fan installs easily to your homes existing ductwork, increasing air flow to the uncomfortable rooms. It can also reduce utility bills by eliminating the necessity of constantly adjusting the thermostat or adding portable electric heaters to cold rooms.

In summertime, the reverse happens.

Installs easily with simple household tools.
